

Step 1 - Clean the Surface

Make sure your chosen surface is completely clean and dry for the best adhesion.

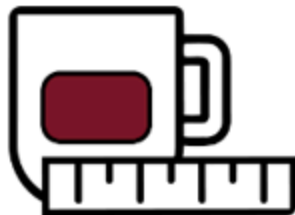

Step 2 - Peel

Carefully peel the transparent film carrier from the backing, avoiding damage to the sticker.

Step 3 - Stick

Place the sticker on the desired surface, positioning it exactly where you want it.

Step 4 - Apply Pressure

Use a squeegee, credit card, or any rigid plastic tool to press down evenly and secure the sticker.

Step 5 - Peel Off Carrier Film

Slowly peel away the carrier film, leaving the UV DTF Sticker firmly attached to your item.
